

FAMOUS DAVE'S TANNER

The only self tanning lotion with:
More Than 12,000 Documented Testimonials!

Why do most self tanners not work?

Almost every self tanner on the market today has at least one of these ingredients: Stearic Acid, Triethanolamine, and/or Mineral Oil. All these ingredients have high pH levels of over 6! What does this mean? A pH of over 6 is the **COLOR ORANGE!** Not quite what you had in mind for a natural looking tan. Famous Dave's Self Tanner does not contain any of these ingredients, yet gives you the most natural, beautiful, and soft tan.

Why Famous Dave's Self Tanner is the best you will ever use:

- **While developing into a natural looking bronze glow, Famous Dave's Tanner bathes your skin in the rich emollients of Aloe Vera, Sesame, and Jojoba, which soften and add healthy moisture.**
- **Famous Dave's Tanner is fragrance free.**
- **Famous Dave's Tanner does not contain the frequently used ingredients that cause skin to turn orange in color.**
- **Famous Dave's Tanner dries to the touch almost immediately as it is applied to the skin and you can dress within 5 minutes after the application.**
- **Creamy lotion is easy to distribute evenly on the body.**
- **Famous Dave's Tanner compliments your existing tan by deepening and evening out your skin tones.**
- **Famous Dave's Tanner can be used all year round to give the most natural looking tan you will ever have from a bottle!**
